

## Script for Reel

Scene 1: Visual: A fast-cut collection of images showcasing the various technical advancements made since 2023, including surgeons using AI robots, individuals exploring metaverses with VR headsets, farmers using drones to monitor crops, and children receiving remote instruction via tablets.

Voiceover: Positive, upbeat tone The world is going to change quite quickly in 2023! All of this is changing due to technology: virtual schools, AI physicians.

Scene 2: Visual: A split screen depicts an AI scientist employing it to create new purification technologies, and a youngster in a remote community attempting to obtain clean water on the other.

Voiceover: The vehicle is empty of occupants.

Scene 3: Visual: An visual montage depicting the organization's activities, including volunteers training locals to use solar panels, giving them tablets for remote learning, and using drones to transport medical supplies into remote places, shows above the logo.

Voiceover: This is our opportunity to help. Close the gap by using technology, which can provide most people with access to water, healthcare, and education.

Scene 4: Visual: upbeat pictures of empowered communities utilising technology: children studying on tablets, locals utilising solar panels to light their homes, and a physician doing remote patient visits in rural locations.

Voiceover: Technology will empower everyone in the future, not just the wealthy.

## Caption for Post

2023 was a whirlwind of tech! From AI in the OR to classrooms in the Metaverse, the world is changing faster than ever. But everyone is not along for this ride.

We are now harnessing tech's power to communicate about, bringing clean water, education, and healthcare to the most unreached population.

Imagine a future where tech empowers everyone, not just the privileged few
